

COVID – 19 Revised Operating Procedures STA 2021 v2.8

Stanground Academy

Completed by: G Carlile

Date: 20/4/21

Covid – 19 Revised Operating Procedures Version 2.8 (April 2021)

Covid-19 Revised Operating Procedures

General Notes

These revised Operating Procedures are a development of the Trust's previous Operating Procedures (V1.6) which were based on limited attendance of pupils and staff on our Academy sites. Following revised UK Government guidance and the requirement for Academies to reopen to all pupils from September, these revised Operating Procedures replace all previous versions and will be supported by revised/updated Coronavirus Risk Assessment Templates where required. Like the previous Operating Procedures, all staff briefings from Principals/Directors will be required.

The Revised Operating Procedures are not meant to be used without the full suite of 'fully open' <u>Covid 19 Risk Assessments</u> first having been reviewed by Principals to be site specific and communicated to all staff. The Operating procedures are meant to assist compliance with the requirements of the Risk Assessments. If after reviewing the Covid-19 Risk Assessments any aspects of the Revised Operating Procedures require amendment for safe operation, then this should be recorded. These Operating Procedures and Covid – 19 Risk Assessments are not a replacement for existing Risk Assessments they are supplementary.

When combined, these constitute the Trust's response to UK Government guidance to support full reopening of Schools and Academies and are designed to keep staff, pupils and visitors safe whilst operating an Educational Facility.

In drawing up these new arrangements, the Trust has consulted with Trades Union through our agreed arrangements and Employee Reps on the Trust Health and Safety Committee and The Trust Board.

These Revised Operating Procedures must be in place to facilitate the opening of academies in support of the UK Government guidelines to welcome back all pupils.

Academy Principals, SLT and Site Staff must read the documentation before attending site after the summer break in order that they are familiar with the instructions and able to Operate Safely ahead of the measures and Risk Assessments being competed.

Purpose

The purpose of the Revised Operating Procedures is to facilitate the full reopening of Trust Academies, **only** in accordance with the guidance issued by the UK Government. Any attempt to operate provision outside the scope contained in the guidance will leave the Trust and individuals exposed to potential prosecution as it will be operating outside of any nationally recognised advice or scientific evidence.

The full UK Government guidance can be found here:

https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak/guidance-for-full-opening-schools

Status

No one in the Trust would want a colleague, pupil or visitor to become ill as a result of attending one of our sites and it is everyone responsibility to ensure that does not happen, if we fail in that responsibility the consequences could be life-threatening.

These Operating Procedures, Risk Assessments and the smart log training are a combined series of Management Instructions. This means that compliance is compulsory. Failure to follow these instructions will result in individuals and ultimately their families being at risk of infection and therefore disciplinary action will be taken for any non-compliance.

Risk Assessments

The revised guidance from the UK government places greater emphasis on the security of extended bubbles. Although 2m distancing is recommended between adults and adults/pupils and 1m distancing between pupils, the guidance recognises that this not always possible. The guidance used language like 'try', 'ideally' and 'should'. In addition, the HSE issued guidance on COVID-19 Risk assessments on 2 July which advises 'Keep work areas 2 metres apart and allocate one person only to each work area. If this is not possible, then keep the number of people in each work area as low as possible'

It is therefore vitally important that you have robust Risk Assessments in place to identify measures where distancing can be maintained they are implemented in order to minimise and/or mitigate when it can't.

HSE

The Government have increased the HSE funding by around 10% in order for them to increase capacity to provide support and guidance to employers to meet the requirements to continue operations. In addition, this funding will be used to increase the level of workplace inspections to ensure compliance with the Coronavirus guidance and protective measures.

Failure to complete a risk assessment which takes account of COVID-19, or completing a risk assessment but failing to put in place sufficient measures to manage the risk of COVID-19, could constitute a breach of health and safety law. The actions the enforcing authority can take include the provision of specific advice to employers to support them to achieve the required standard, through to issuing enforcement notices to help secure improvements.

Serious breaches and failure to comply with enforcement notices can constitute a criminal offence, with serious fines and even imprisonment for up to 2 years.

RIDDOR reporting

The HSE have revised RIDDOR guidance so that incidences of Coronavirus are now RIDDOR reportable if there is a reasonable evidence that it was caused by exposure at work: <u>https://www.hse.gov.uk/news/riddor-reporting-coronavirus.htm</u>

This places greater emphasis on our protective measures to keep people safe and avoid transmission. Covid – 19 Revised Operating Procedures Version 2.8 (April 2021) visitors safe whilst operating an Educational Facility. ttee and The Trust Board.

Health and Safety Committee/Trades Union Consultation

The Trust has consulted with and shared all revised Operating guidance with the Health and Safety Committee which comprises local Union and Employee reps and has had wider dialogue with all Trades Unions.

Trust Board/Senior Leadership Team

The Revised Operating Procedures are supported and endorsed by the Trust Board and the Senior Leadership Team.

Programme for Reopening

UK Government guidance has indicated a reopening to all pupils in September for primary academies and secondary academies, however, the Trust envisages that Principals may wish to consider a phased approach to full reopening, to enable staff and students to orientate themselves with the revised Operating Procedures and the increased occupancy/demands on facilities/infrastructure. Full reopening is also dependent on assurance that all of the measures and requirements of these Operating Procedures are embedded into practice. Outline timetable - Approval of OPs/RAs

- 6 July draft Operating Procedures shared with SLT
- 7 July draft shared with Unions, Health and Safety Committee, Trust Board
- 7 July approved Operating Procedures shared with Principals
- 8 15 July revised RAs, Guidance etc. developed and shared with H&S reps
- 8 July Principals Q&A
- If Principals do not propose amendments and have not elected to take any of the optional decisions where indicated then they should confirm this within the OPs and then complete the required site-specific RAs
- If Principals have proposed amendments then these should be submitted by 10 July for consideration, following approval or otherwise OPs should be updated and the required site-specific RAs competed all proposed amendments should be described in the OPs and highlighted in red text for ease of identification
- If Principals choose to make a local decision where this is indicated as permissible, then this should be demonstrated in the OPs with a description of the decision in red text for ease of identification and supported by Risk Assessment. Until this is complete these decisions will not be supported.
- 13-15 July Amendments approved/declined ٠
- 8 July 13 July Academy specific RAs completed
- By 16 July Academy specific Risk Assessments and Approved Operating Procedures shared with Unions/ All staff and training plans/briefings scheduled for beginning of term ٠
- By 17 July publish Risk Assessments (This is an HSE requirement) and Operating Procedures on Academy Website

Implementation of Protective Measures etc. identified in Risk Assessments

20 July – end of summer break, additional protective measures for 1m plus implemented (PPE/Screens etc.

Prior to reopening

- Phase 1 After first reviewing this document and associated Risk Assessments, Principals, SLT, Site Managers H&S Contact and rep review preparations, walk through arrangements, revise and update risk assessments to be site specific, seek approvals for variations to Operating Procedures, complete readiness for opening statement or issue delay notice.
- Phase 2 All staff (ink SLT) review all Operating Procedures, Risk Assessments and Guidance. All Trust employees will be required to confirm that they have read the Operating Procedures and Risk Assessments and that they have had an opportunity to ask questions at a Principals briefing (on-line), groups of staff start return to work (only those required to be on site) in accordance with new procedures. Principals hold staff briefings either on Teams or in small groups social distancing, letter to parents outlining the approach and new procedures. We understand that Principals may choose to use INSET for this

On reopening

Principal's Role

Principals are required to undertake a number of actions to enact these Operating Procedures all of which must be in place before any Academy is approved for reopening.

- Conduct a full site inspection with the Site Manager and H&S Contact and rep to confirm readiness to open
- Review all Risk Assessments and guidance and ensure appropriate modifications are made to ensure they are site specific
- Complete the Principal's section of the revised operating procedures document
- Ensure and document that all staff have read and understood Risk Assessments and the Operating Procedures
- Ensure all staff have who have not previously completed the Smart log training (as they haven't previously attended site or are new starters) and hold a staff briefing session before receiving any pupils. ٠
- Ensure the site-specific Risk Assessment (once completed) is signed and uploaded to smart log. ٠

Access to Site

Staff will be issued with an email to confirm they have completed the smart log training module and reviewed the Operating Procedures/Risk Assessments via an MS Form. Without this evidence there will be no access to site.

Access

This should be arranged with site staff. However, access should be managed in a way which is consistent with these Operating Procedures and in a manner where hygiene/cleaning is maintained.

Weekly Assurance

Each morning before opening for the day, the Site Staff will conduct a site inspection to ensure that all protection measures within their control as set out in the Risk Assessments are in place and the site is ready for operation. Principals are responsible for ensuring all other controls including e.g. classroom layouts, social distancing, etc. are complied with on an ongoing basis.

In addition, Principals will conduct a weekly assurance return to the Trust, following a site walk with the H&S Contact, rep and the Site Manager, with a read out of daily inspections, a review of the Risk Assessment in practice and any modifications made/proposed.

	All staff
Issue	How we're addressing it
	RAs are in place and in all respects, the clinically extremely vulnerable should now follow the guidance from the NHS to not attend and work from hole possible. The clinically vulnerable population should take particular care to practice frequent, thorough hand washing, and cleaning of frequently touched their home or workspace Adults should maintain 2 metre distance from others, and where this is not possible avoid close face to face contact and mini spent within 1 metre of others. While the risk of transmission between young children and adults is likely to be low, adults should continue to take care of distance from other adults including older children/adolescents.
	 CEV Children - The advice for pupils who have been confirmed as clinically extremely vulnerable is to shield and stay at home as much as possible further notice. They are advised not to attend school while shielding advice applies nationally. CEV staff - Although shielding ends from 1 April CEV staff in schools who are CEV will be advised to continue to work from home where possible they cannot work from home should attend their workplace.
	Staff are to follow current social distancing guidance, remaining 2m apart where possible. Where this is not possible, 1m with protection e.g. a face mask outdoors, or indoors with ventilation. (Guidance from Coronavirus: Social Distancing, DFE 7 Oct 2020)
	Staff can approach children to support with learning if they are wearing a mask and do not work face to face.
	Staff must wear face masks at all times in communal areas and classrooms where social distancing cannot be maintained, even if students are not in the
	Key points from new guidance:
	Unless social distancing can be maintained in classrooms then secondary pupils and staff must wear facemasks in classrooms
	 Primary staff must wear facemasks in communal areas Visors are not now considered as an effective face covering and masks should be worn as above (visors may <u>also</u> be worn if preferred. The process for putting on, removing and storing face masks must be communicated to staff and instruction given to pupils. The hand washing or hand sanitising regime must now include On arrival After breaks
	 On room changes After eating The requirement '<i>Must do everything to minimise contacts and mixing</i>' still stands The requirement for ventilation has been clarified and this is compatible with the Trust's previous advice – if any Academy was not prefollowing this then this is now a requirement
	Please see the guidance 'COVID-19 Guidance for Principals - full opening of schools' from the People Directorate emailed to all Principals 17Ju

Potential cases of COVID-19 -

minimising contact with individuals who are unwell by ensuring that those who have coronavirus (COVID-19) symptoms, or who have someone in their household who does, do not attend school Ensuring that pupils, staff and other adults do not come into the school if they have <u>coronavirus (COVID-19) symptoms</u>, or have tested positive in the la and ensuring anyone developing those symptoms during the school day is sent home, are essential actions to reduce the risk in schools and further or transmission of coronavirus (COVID-19). All schools must follow this process and ensure all staff are aware of it.

If anyone in the school becomes unwell with a new, continuous cough or a high temperature, or has a loss of, or change in, their normal sense of tas (anosmia), they must be sent home and advised to follow 'stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) which sets out that they must self-isolate for at least 7 days and should arrange to have a test to see if they have coronavirus (COVID-19). Other member household (including any siblings) should self-isolate for 10 days from when the symptomatic person first had symptoms.

If a child is awaiting collection, they should be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age and the child, with appropriate adult supervision if required. Ideally, a window should be opened for ventilation. If it is not possible to isolate them, move them which is at least 2 metres away from other people.

If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom must be cleaned and using standard cleaning products before being used by anyone else.

PPE must be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as for a very young child with complex needs). More information on PPE use can be found in the <u>safe working in education</u>, <u>childcare and children's</u> <u>social care settings</u>, <u>including personal protective equipment (PPE)</u> guidance.

As is usual practice, in an emergency, call 999 if someone is seriously ill or injured or their life is at risk. Anyone with coronavirus (COVID-19) symptoms visit the GP, pharmacy, urgent care centre or a hospital.

Any members of staff who have helped someone with symptoms and any pupils who have been in close contact with them do not need to go home to a unless they develop symptoms themselves (in which case, they should arrange a test) or if the symptomatic person subsequently tests positive (see belo have been requested to do so by NHS Test & Trace.

Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is u area around the person with symptoms must be cleaned with normal household disinfectant after they have left to reduce the risk of passing the infection people. See the COVID-19: cleaning of non-healthcare settings guidance.

Public Health England is clear that routinely taking the temperature of pupils is not recommended as this is an unreliable method for identifying coronaviru 19).

Where local restrictions apply

In areas where local lockdowns or restrictions are in place, face coverings should be worn by adults and pupils (in years 7 and above) in areas outside classrooms when moving around communal areas where social distancing is difficult to maintain such as corridors. In the event of new local restrictions being imposed, schools will need to communicate quickly and clearly to staff, parents, pupils that the new arrangements require the use of face coverings in certain circumstances. Exemptions

Some individuals are exempt from wearing face coverings. This applies to those who:

• cannot put on, wear or remove a face covering because of a physical or mental illness or impairment or disability

• speak to or provide assistance to someone who relies on lip reading, clear sound or facial expression to communicate The same exemptions will apply in education settings, and we would expect teachers and other staff to be sensitive to those needs. – Students who are exempt will be clearly identified by the academy.

	It is reasonable to assume that staff and young people will now have access to face coverings due to their increasing use in wider society, and Public Health England has made available resources on how to make a simple face covering.
	From 02/11/20 all staff and students now wear masks in inside communal areas to add the additional safety level. This will mean that staff can revert to being stationary in their room with a high level of cleaning after every lesson. Staff must wear face coverings when moving around the building in communal areas even when students have left for the day.
	Will have a cleaning routine built into the end of every lesson to keep the standards of cleanliness high. (Keep 5 min changeover time for cleaning routine)
	Based on current evidence and the measures that schools are already putting in place, such as the system of controls and consistent bubbles, face coverings will not be necessary in the classroom even where social distancing is not possible.
	 Further guidance on face coverings Safe working in education, childcare and children's social care provides Face coverings in education settings
	In terms of infection control and testing:
	 If we as an Academy record 2 or more positive tests in a 14-day period (or you are concerned that an overall rise in absence is because COVID is suspected) then this is a potential outbreak and you should call PHE for advice From 8 March Secondary academies will offer 3 tests to pupils 3-5 days apart (this can be phased) after 3 tests pupils will carry out home testing twice a week. Priority for KW, Vu, Y10 & Y13. The existing RA for secondary testing is suitable From 8 March Secondary staff will test at home twice a week (inc Nottingham Primary) The existing RA for Primary testing at home is currently suitable for this process. I'll separately send a copy to Secondary Principals for review/amendment No change to testing for Primary staff
DfE MUST	Schools must ensure they understand the NHS Test and Trace process and how to contact their local <u>Public Health England health protection team</u> . Schools must ensure that staff members and parents/carers understand that they will need to be ready and willing to:
Test and Trace - Engage with the NHS Test and Trace process	 <u>book a test</u> if they are displaying symptoms. Staff and pupils must not come into the school if they have symptoms, and must be sent home to self-isolate if they develop them in school. All children can be tested, including children under 5, but children aged 11 and under will need to be helped by their parents/carers if using a home testing kit
	 provide details of anyone they have been in close contact with if they were to test positive for coronavirus (COVID-19) or if asked by NHS Test & Trace <u>self-isolate</u> if they have been in close contact with someone who develops coronavirus (COVID-19) symptoms or someone who tests positive for coronavirus (COVID-19)
	Anyone who displays symptoms of coronavirus (COVID-19) can and should get a test. Tests can be booked online through the NHS testing and tracing for coronavirus website, or ordered by telephone via NHS 119 for those without access to the internet. Essential workers, which includes anyone involved in education or childcare, have priority access to testing.
	Latest guidance confirms that home testing kits will be made available to schools. By the autumn term, all schools will be provided with a small number of home testing kits that they can give directly to parents/carers collecting a child who has developed symptoms at school, or staff who have

	developed symptoms at school, where they think providing one will significantly increase the likelihood of them getting tested. Advice will be provided alongside these kits.	
	The government will ensure that it is as easy as possible to get a test through a wide range of routes that are locally accessible, fast and convenient. We will release more details on new testing avenues as and when they become available and will work with schools so they understand what the quickest and easiest way is to get a test. By the autumn term, all schools will be provided with a small number of home testing kits that they can give directly to parents/carers collecting a child who has developed symptoms at school, or staff who have developed symptoms at school, where they think providing one will significantly increase the likelihood of them getting tested. Advice will be provided alongside these kits.	
	Schools should ask parents and staff to inform them immediately of the results of a test:	
	 if someone tests negative, if they feel well and no longer have symptoms similar to coronavirus (COVID-19), they can stop self-isolating. They could still have another virus, such as a cold or flu – in which case it is still best to avoid contact with other people until they are better. Other members of their household can stop self-isolating. 	
	If someone tests positive, they should follow the <u>'stay at home: guidance for households</u> with possible or confirmed coronavirus (COVID-19) infection' and must continue to self-isolate for at least 7 days from the onset of their symptoms and then return to school only if they do not have symptoms other than cough or loss of sense of smell/taste. This is because a cough or anosmia can last for several weeks once the infection has gone. The 7-day period starts from the day when they first became ill. If they still have a high temperature, they should keep self-isolating until their temperature returns to normal. Other members of their household should continue self-isolating for the full 14 days.	
DfE MUST Manage confirmed cases of	Schools must take swift action when they become aware that someone who has attended has tested positive for coronavirus (COVID-19). Schools should contact the local health protection team. This team will also contact schools directly if they become aware that someone who has tested positive for coronavirus (COVID-19) attended the school – as identified by NHS Test and Trace.	
coronavirus (COVID- 19) amongst the	The health protection team will carry out a rapid risk assessment to confirm who has been in close contact with the person during the period that they were infectious, and ensure they are asked to self-isolate.	
school community	In order to support this process Principals must ensure there is an effective way of recording attendance in bubbles (staff and pupils), visitors and contractors.	
	The health protection team will work with schools in this situation to guide them through the actions they need to take. Based on the advice from the health protection team, schools must send home those people who have been in close contact with the person who has tested positive, advising them to self-isolate for 14 days since they were last in close contact with that person when they were infectious. Close contact means:	
	 direct close contacts - face to face contact with an infected individual for any length of time, within 1 metre, including being coughed on, a face to face conversation, or unprotected physical contact (skin-to-skin) proximity contacts - extended close contact (less than 2 metres for more than 15 minutes) with an infected individual travelling in a small vehicle, like a car, with an infected person 	
	The health protection team will provide definitive advice on who must be sent home. To support them in doing so, we recommend schools keep a record of pupils and staff in each group, and any close contact that takes places between children and staff in different groups (see <u>section 5 of system of control</u> for more on grouping pupils). This should be a proportionate recording process. Schools do not need to ask pupils to record everyone they have spent time with each day or ask staff to keep definitive records in a way that is overly burdensome.	
	A template letter will be provided to schools, on the advice of the health protection team, to send to parents and staff if needed. Schools must not share the names or details of people with coronavirus (COVID-19) unless essential to protect others.	
	Household members of those contacts who are sent home do not need to self-isolate themselves unless the child, young person or staff member who is self- isolating subsequently develops symptoms. If someone in a class or group that has been asked to self-isolate develops symptoms themselves within their 14-day	

isolation period they should follow <u>'stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) infection</u>. They should and:

• if the test delivers a negative result, they must remain in isolation for the remainder of the 14-day isolation period. This is because they could still d coronavirus (COVID-19) within the remaining days. • if the test result is positive, they should inform their setting immediately, and must isolate for at le from the onset of their symptoms (which could mean the self-isolation ends before or after the original 14-day isolation period). Their household should should set the days from when the symptomatic person first had symptoms, following <u>'stay at home: guidance for households with possible or confirmed c (COVID-19) infection</u>'

DfE guidance states that 'Schools should not request evidence of negative test results or other medical evidence before admitting children or w them back after a period of self-isolation'.

Further guidance is available on testing and tracing for coronavirus (COVID-19).

d get a test,	
develop the east 7 days self-isolate coronavirus	
welcoming	

DfE MUST Contain any outbreak- by following local health protection team advice	If schools have two or more confirmed cases within 14 days, or an overall rise in sickness absence where coronavirus (COVID-19) is suspected, they may an outbreak, and must continue to work with their local health protection team who will be able to advise if additional action is required. In some cases, health protection teams may recommend that a larger number of other pupils self-isolate at home as a precautionary measure – perhap whole site or year group. If schools are implementing controls from this list, addressing the risks they have identified and therefore reducing transmission whole school closure based on cases within the school will not generally be necessary, and should not be considered except on the advice of health prote teams. In consultation with the local Director of Public Health, where an outbreak in a school is confirmed, a mobile testing unit may be dispatched to test others may have been in contact with the person who has tested positive. Testing will first focus on the person's class, followed by their year group, then the school if necessary, in line with routine public health outbreak control practice
DfE MUST Hygiene - cleaning hands more often than usual – wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered DfE MUST Ensuring good respiratory hygiene - by promoting the 'catch it, bin it, kill it' approach	Coronavirus (COVID-19) is an easy virus to kill when it is on skin. This can be done with soap and running water or hand sanitiser. Schools must ensur pupils clean their hands regularly, including when they arrive at school, when they return from breaks, when they change rooms and before and after end Regular and thorough hand cleaning is going to be needed for the foreseeable future. Points to consider and implement: Points to consider and implement: • whether the school has enough hand washing or hand sanitiser 'stations' available so that all pupils and staff can clean their hands regularly • supervision of hand sanitiser use given risks around ingestion. Small children and pupils with complex needs should continue to be helped to clean hands properly. Skin friendly skin cleaning wipes can be used as an alternative • building these routines into school culture, supported by behaviour expectations and helping ensure younger children and those with complex understand the need to follow them Every room has a sanitiser for student use and one for staff. The 'catch it, bin it, kill it' approach continues to be very important, so schools must ensure that they have enough tissues and bins available in the sch support pupils and staff to follow this routine. As with hand cleaning, schools must ensure younger children and those with complex needs are helped to g right, and all pupils understand that this is now part of how school operates. Some pupils with complex needs will struggle to maintain as good respiratory hy as their peers, for example those who spit uncontrollably or use saliva as a sensory stimulant. This should be considered in risk assessments in order to si these pupils and the staff working with them, and is not a reason to deny these pupils face to face education. Public Health England does not (based on current evidence) recommend the use of face coverings in schools. This evidence will be kept under review. The not required in schools as pupils and staff are mixing in consistent group
DfE MUST	COVID-19 is easy to kill on surfaces and skin and you don't need specialist cleaning products to do so – normal cleaning products will do this.
Introduce enhanced cleaning including cleaning frequently touched surfaces often using	 Points to consider and implement, putting in place a cleaning schedule that ensures cleaning is generally enhanced and includes: The Trust has confirmed the requirement for a minimum of four cleans per day and provided a cleaning schedule which identifies high contact sur However, frequencies may need to be increased if a Risk Assessment identifies that there is an increased potential for contamination, e.g. class groups using the same areas/facilities more frequent cleaning of rooms / shared areas that are used by different groups
standard products,	 frequently touched surfaces being cleaned more often than normal different groups don't need to be allocated their own toilet blocks, but toilets will to be cleaned regularly and pupils must be encouraged to clean their hands thoroughly after using the toilet

such as detergents and bleach	By the end of the summer term, Public Health England will publish revised guidance for cleaning non-healthcare settings to advise on general cleaning re- in addition to the current advice on <u>COVID-19</u> : cleaning of non-healthcare settings guidance.
DfE MUST Minimise contact	Minimising contacts and mixing between people reduces transmission of coronavirus (COVID-19). This is important in all contexts, and schools must context how to implement this.
between individuals and maintain social distancing wherever	Student are never taught in mixed year groups so the bubble remains intact at all times. Students continue to have lunch and break areas in separate ar school to keep the integrity of the bubble. If students all have masks, then they will add an extra layer of protection.
possible	Staff need to remain in their classrooms so Teaching and Learning is not adversely affected. Currently I would not be confident to say we are offering a curriculum. If staff are able to teach in subject specialist rooms this will enhance the ability to offer a broad and balanced curriculum. The wearing of mask on site will ensure the risk factor is significantly reduced.
	You must do everything possible to minimise contacts and mixing. Your overarching objective should be to reduce the number of contacts between pupils/st and staff. This can be achieved through keeping groups separate (in bubbles) and through maintaining the social distance between individuals. This achieved by ensuring students and staff follow the 'keep to the left' rule in corridors. Students will also be directed to move quickly and efficiently to their left'
	If staff/TA's need to move between classes and year groups, they should try and keep their distance from pupils and other staff as much as they can, in metres from other adults and must wear a face covering.
	It is likely that for younger children the emphasis will be on separating groups, and for older children it will be on distancing. For children old enough, they also be supported to maintain distance and not touch staff where possible.
Grouping pupils	Consistent groups reduce the risk of transmission by limiting the number of pupils and staff in contact with each other to only those within the group. They been used in schools in the summer term in recognition that children, and especially the youngest children, cannot socially distance from staff or from each and this provides an additional protective measure. Maintaining distinct groups or 'bubbles' that do not mix makes it quicker and easier in the event of a p case to identify those who may need to self-isolate, and keep that number as small as possible.
	However, the use of small groups restricts the normal operation of schools and presents both educational and logistical challenges, including the cleaning use of shared spaces, such as playgrounds, boarding houses, dining halls, and toilets, and the provision of specialist teaching. This is the case in both presents and secondary schools, but is particularly difficult in secondary schools.
	In this guidance for the autumn term, maintaining consistent groups remains important, but given the decrease in the prevalence of coronavirus (COVID-1 the resumption of the full range of curriculum subjects, schools may need to change the emphasis on bubbles within their system of controls and increa size of these groups.
	In secondary schools, and certainly in the older age groups at key stage 4 and key stage 5, the groups are likely to need to be the size of a year group to a schools to deliver the full range of curriculum subjects and students to receive specialist teaching. If this can be achieved with small groups, the recommended. At primary school, and in the younger years at secondary (key stage 3), schools may be able to implement smaller groups the size of a full If that can be achieved, it is recommended, as this will help to reduce the number of people who could be asked to isolate should someone in group beck with coronavirus (COVID-19).
	Schools should assess their circumstances and if class-sized groups are not compatible with offering a full range of subjects or managing the practical low within and around school, they can look to implement year group sized 'bubbles'. Whatever the size of the group, they should be kept apart from other group sized and older children should be encouraged to keep their distance within groups. Schools with the capability to do it should take steps to interaction, sharing of rooms and social spaces between groups as much as possible. When using larger groups, the other measures from the system of compare even more important, to minimise transmission risks and to minimise the numbers of pupils and staff who may need to self-isolate.

o enable hey are III class. come ill	
ogistics groups to limit controls	

	Both the approaches of separating groups and maintaining distance are not 'all-or-nothing' options, and will still bring benefits even if implemented partially. schools may keep children in their class groups for the majority of the classroom time, but also allow mixing into wider groups for specialist teaching, wrapa care and transport, or for boarding pupils in one group residentially and another during the school day. Siblings may also be in different groups. Endeavou keep these groups at least partially separate and minimising contacts between children will still offer public health benefits as it reduces the network of por direct transmission.
	important for secondary schools. Where staff need to move between classes and year groups, they should try and keep their distance from pupils and oth as much as they can, ideally 2 metres from other adults. Again, we recognise this is not likely to be possible with younger children and teachers in primary s can still work across groups if that is needed to enable a full educational offer.
Measures within the classroom	Maintaining a distance between people whilst inside and reducing the amount of time they are in face to face to contact lowers the risk of transmission. It is public health advice that staff in secondary schools maintain distance from their pupils, staying at the front of the class, and away from their colleagues possible. Ideally, adults should maintain 2 metre distance from each other, and from children. We know that this is not always possible, particularly when w with younger children, but if adults can do this when circumstances allow that will help. In particular, they should avoid close face to face contact and min time spent within 1 metre of anyone. Similarly, it will not be possible when working with many pupils who have complex needs or who need close contact. These pupils' educational and care support should be provided as normal.
	Key points from new guidance:
	Unless social distancing can be maintained in classrooms then secondary pupils and staff must wear facemasks in classrooms
	 Primary staff must wear facemasks in communal areas Visors are not now considered as an effective face covering and masks should be worn as above (visors may <u>also</u> be worn if preferred. The process for putting on, removing and storing face masks must be communicated to staff and instruction given to pupils The hand washing or hand sanitising regime must now include On arrival After breaks On room changes
	 After eating The requirement '<i>Must do everything to minimise contacts and mixing</i>' still stands The requirement for ventilation has been clarified and this is compatible with the Trust's previous advice – if any academy was not previously following this then this is now a requirement
	For children old enough, they should also be supported to maintain distance and not touch staff and their peers where possible. This will not be possible for youngest children and some children with complex needs and it is not feasible in some schools where space does not allow. Schools doing this where the and even doing this some of the time, will help.
	Schools should make small adaptations to the classroom to support distancing where possible. That should include seating pupils side by side and facing for rather than face to face or side on, and might include moving unnecessary furniture out of classrooms to make more space.

orwards,	

Measures elsewhere	Groups should be kept apart, meaning that schools should avoid large gatherings such as assemblies or collective worship with more than one group.
	When timetabling, groups should be kept apart and movement around the school site kept to a minimum. While passing briefly in the corridor or playgrou low risk, schools should avoid creating busy corridors, entrances and exits. Schools should also consider staggered break times and lunch times (and time cleaning surfaces in the dining hall between groups).
	The staggering of lunches already happens which creates a calm, purposeful site. Corridors will have to be supervised during transitions around the site.
	Schools should also plan how shared staff spaces are set up and used to help staff to distance from each other. Use of staff rooms should be minimised, alth staff must still have a break of a reasonable length during the day.
	Toilets will need to be cleaned regularly and pupils must be encouraged to clean their hands thoroughly after using the toilet - different groups being allo their own toilet blocks has been considered but is not a requirement if the site does not allow for it
	Measures elsewhere

Class group or year group bubbles	Year groups should be kept separate from each other during the course of the school day to form a year group bubble who do not mix with other pupils.
	New Risk Assessment completed to mitigate any additional risks by letting students move from teacher to teacher. With masks on, and all students walki the left, students would remain as safe as they are currently, if not more so (as masks are not compulsory).
	While passing briefly in the corridor or playground is low risk, you'll want to avoid creating very busy corridors or entrances and exits. You will also wa consider staggered break times and lunch times (and time for cleaning surfaces in the dining hall between groups).
	Lunchtime remains staggered. Each year group has its own entrance and exit at the start and end of the day.
Staff Bubbles	Although staff can work across multiple classes, the creation of staff bubbles to support class or year groups should be considered. This would give flexib staff to work across a number of classes should the need arise and could also facilitate the reopening of staff rooms/meeting on a rota basis for staff b provided social distancing and hygiene (cleaning) resources are available. This may also reduce the impact of any potential outbreak on staffing numbers.
Training	All staff are required to complete the smart log online Coronavirus awareness module – COVID-19 (Educational Settings) and familiarise themselves win new Operating Procedures outlined in this document, the suite of CV-19 risk assessments and all relevant Trust/ UK government guidance.
	Once complete, all staff must complete the MS form (click here) to confirm that they have read the Operating Procedures and Risk Assessment completed the online smart log module. Once submitted, an e-mail confirming this will be sent to the member of staff and this can be used to that the staff member is ready to be on site. Without this confirmation staff must not be permitted on site.
	Consultation taken place so all staff understand the changes.
	If staff are unable to access the smart log training from home, then local arrangements will be required to facilitate a safe access to site and socially distance of the environment within the academy to provide access to devices which must be cleaned with antiviral wipes after use.
	As a backup, the Operations Directorate will provide each Academy with a list of staff who have completed the smart log training, confirmed that they have and understood the Risk Assessments, Guidance and Revised Operating Procedures.
Peripatetic, Supply or Agency	The general position that wherever possible staff should work from home still applies. Therefore, all visits by any non-academy staff (Central team, includ technicians) should be essential and supported by Risk Assessment or preferably carried out using Teams. The only exceptions are where work has to be c

uding IT carried	

staff	out on equipment e.g. servers, individual items. If this is required, then it must be carried out in accordance with the Covid -19 Risk Assessments and appropriate PPE must be available if required.
	From September it is also possible for staff to operate across different class groups/year groups. This is particularly important for Secondary Academies. Supply teachers, peripatetic teachers and/or other temporary staff can move between schools. They should ensure they minimise contact and maintain as much distance as possible from other staff. You should consider the needs for supply or agency staff carefully and if required agree longer term assignments as this will further minimise the number of contacts.
	Good hygiene practice for workstations etc. must be practiced if different staff are using the same workstations. It is the Trust's preference that staff do not work across multiple sites and temporary staff who work in this way are not engaged – see below
	For Academy staff with roles across more than one site Principals need to consider how to mitigate transition and maintain the integrity of class or year group bubbles.
	All of the Trust's Operating procedures, Risk assessments and training requirements apply to supply, agency, other temporary staff or visitors working in schools such as support staff working on a supply basis, peripatetic teachers such sports coaches, and those engaged to deliver before and after school clubs
Travel to/from so	chool Dedicated school transport, including statutory provision
	Pupils on dedicated school services do not mix with the general public on those journeys and pupil groups will tend to be consistent under return to school measures. Therefore, wider transmission risks are likely to be lower.
	From the autumn term, local authorities will not be required to uniformly apply the social distancing guidelines for public transport, on dedicated school or college transport. However, distancing should still be put in place within vehicles wherever possible. This will help to both minimise disease transmission risks and maintain consistent reinforcement of public health messaging to children and staff, particularly at the point where they are leaving school and heading back into the community each day.
	The approach to dedicated transport should align wherever possible with the principles underpinning the system of controls set out in this document and with the approach being adopted for your school.
	Principals should communicate with Parents and pupils who use public transport to ensure they are aware of the requirements for face coverings and explain the importance that wherever it is possible:
	 social distancing should be maximised within vehicles children either sit with their 'bubble' on school transport, or with the same constant group of children each day
	 children should clean their hands before boarding transport and again on disembarking additional cleaning of vehicles is put in place
	 organised queuing and boarding is put in place
	through ventilation of fresh air (from outside the vehicle) is maximised, particularly through opening windows and ceiling vents
	More information on this can be found at the safer travel guidance for passengers.
	Children must not board home to school transport if they, or a member of their household, has symptoms of coronavirus (COVID-19).
	Further information on face coverings is set out in the transport to school and other places of education: autumn term 2020 guidance.

It will also require a partnership approach between local authorities, schools, trusts, dioceses and others. In particular, it is imperative that schools work with local authorities that have statutory responsibility for 'home to school transport' for many children, as well as a vital role in working with local transport providers to ensure sufficient bus service provision.

Given the pressures on public transport services, it may also be necessary to work with local authorities so that they can identify where it might be neces provide additional dedicated school transport services, including in places where these services do not currently operate. The government has announce additional funding for local transport authorities for this purpose, available at free school travel: funding allocations.

Wider public transport

In many areas, pupils normally make extensive use of the wider public transport system, particularly public buses. Public transport capacity will continue constrained in the autumn term. Its use by pupils, particularly in peak times, should be kept to an absolute minimum.

To facilitate the return of all pupils to school, it will be necessary to take steps to both depress the demand for public transport and to increase capacity we the system. Both will require action at a national and local level. Schools have a critical role to play in supporting collaboration between all parties - provide local authorities, parents and pupils. Further information on managing capacity and demand on public transport is set out in the transport to school and concerns of education: autumn term 2020 guidance.

Schools should work with partners to consider staggered start times to enable more journeys to take place outside of peak hours. We recognise that this will be more feasible in some circumstances than others.

Schools should encourage parents, staff and pupils to walk or cycle to school if at all possible. Schools may want to consider using 'walking buses' (a supervised group of children being walked to, or from, school) or working with their local authority to promote safe cycling routes.

The Department for Transport is asking local authorities to:

- work with schools and parents to identify public transport routes that may be under particular pressure and potential alternatives
- consider a range of options for shifting demand for public transport onto other modes

consider using traffic demand management approaches in order to ensure that children are able to attend school from the start of the autumn term

Travel patterns, the availability of vehicles, the length of journeys undertaken, and other local pressures on public transport vary significantly. The govern recognises the challenge but is confident that if all available options are considered by all parties it will be possible to reduce demand and ensure transport available for those who need it most.

Essential visitors	All essential visitors should be provided with a copy of these revised operating procedures and confirm that they are able to comply with them for the entity
	their time on site. Contractors carrying out essential works must provide risk assessments and method statements and this must now include COVID-1 assessments. Contractors must confirm that their employees have been provided with COVID-19 Risk Assessments in order for them to undertake their safely.
	It is vitally important that essential visitors to academies are given information regarding our COVID-19 Operating Procedures and Risk Assessments that them to attend the site safely and not expose themselves or others to additional risks.
	In order to make it easier to manage visitors to site the and comply with the current COVID-19 Operating Procedures the Trust is expanding the existin Safeguarding lanyard identification procedure already in place in the majority of academies. From 1 September 2020 all academies will be required to op consistent Safeguarding/COVID-19 procedure based on red, green and blue lanyards.
	Visitors to site should be placed in four categories (when Academy open):
	I. Those who need to visit reception and go no further.
	In these circumstances visitors must have an appointment (unless in the case of an emergency) before coming on to site and comply with the general procedures identified on the COVID-19 poster displayed externally at reception.
	II. Those who will be accompanied at all times.
	These visitors will be chaperoned by a member of staff who is fully briefed on the academy Operating Procedure and Risk Assessments and we therefore only be required to confirm that they have reviewed a brief outline of academy specific COVID19 measures to be produced by the academy. These visitors will not require DBS clearance and will therefore be given a Red Lanyard
	III. Those who will not be accompanied.
	These visitors will be required to confirm they have read the full Academy Operating Procedure and Risk Assessments. These visitors will req DBS clearance and will therefore be given a green lanyard
	IV. Visitors who will not be accompanied but who do not need DBS clearance as they will only be on site when there are no pupils. This will most likely only apply to contractors carrying out maintenance type work before or after the academy day. These visitors will be given lanyard.
	In summary, a green lanyard can only be issued to visitors who have been DBS cleared and have reviewed the COVID-19 Operating Procedures and Assessment, a blue lanyard can be issued to visitors who have reviewed the COVID-19 Operating Procedures and Risk Assessment on site when there pupils, a red lanyard for anyone else.
	In order to facilitate this the Trust have ordered quantities of each colour lanyard for all academies, which have been distributed to academies.

ial distancing in	All academies should have details of the size of classrooms based on the work already completed for partial opening.
issrooms, ning/hall spaces	This information can be reused to recalculate the number of desks it is possible to arrange in a classroom whilst aiming to maintain 1m distancing for pupils and 2m distancing for staff. If it is not possible to create space for sufficient pupil's numbers, then Principals must arrange classrooms to support as much distancing as possible in accordance with the DfE guidance.
	Whilst the arrangement of forward facing desks is one of the DfE essential measures and Principals are advised to make small adaptations to the classroom to support distancing where possible. 'That should include seating pupils side by side and facing forwards, rather than face to face or side on', they also 'recognise that the youngest children will not be able to maintain social distancing, and it is acceptable for them not to distance within their group'.
	All STA classrooms will remain set out in lines so students are facing the same direction.
	Support staff who are working with individual EHCP students will leave the rooms with the student they support 5 mins early so they are able to safely navigate whilst the corridors are empty.
	DfE guidance recommends that staff and pupils have their own items that are not shared. Classroom based resources, such as books and games, can be used and shared within the bubble; these should be cleaned regularly, along with all frequently touched surfaces.
	Stationary items should not be shared across bubbles and staff should have year group sets of stationary in each classroom.
	Staff must manage the movement of pupils safely whilst on Academy premises – this applies to movements inside classrooms and throughout the building.
	Schools should also plan how shared staff spaces are set up and used to help staff to distance from each other. Use of staff rooms should be minimised, although staff must still have a break of a reasonable length during the day. See below for how this can be facilitated:
	Meeting rooms, staffrooms may be used for welfare breaks only (no general use or meetings) where 2m distancing can be maintained. If there is not sufficient cleaning resource (taking into account, the other demands on cleaning staff) and there is not an effective way of recording that the cleaning has taken place after every use then these areas are to remain out of use and be signed accordingly.
	Site staff will remove furniture to ensure that the number of chairs in staff rooms are such that social distancing can be maintained. This will create a maximum occupancy level which must not be
	breeched. On this basis staff must be informed that if there is no chair available they must not use the room.
	Staff will be required to sanitise their hands on entry and exit and use antiviral wipes to clean the kettle/fridge door handle etc. after use. All crockery and cutlery will be removed. Staff will be required to bring their own and take it home at the end of each day for cleaning.
	Provided there is capacity for storage elsewhere on site (without compromising safe access/egress in emergencies) Halls and Gyms may be used unless required as additional space for the catering service.
	Where dining halls are used for dining then this must be in accordance with distancing requirements and subject to cleaning after every use. Multiple bubbles (classes or year groups) can use the hall for dining at the same time provided there is separation of at least 7 dining places in between. Measures must be in place to manage the integrity of bubbles if more than one are in the dining space at any one time.

Lunch provision may be a mix of classroom service, dining hall service or both. In order to facilitate dining in halls rather than classrooms Principals may amend the lunch time service to stagger provision, however this will be subject to the capacity of the catering service to facilitate an 'extended' service a cleaning service to clean between class group or year group bubbles.

Principals may choose to restrict dining in hall spaces to those pupils who are taking a paid/(U)FSM meal only. Pupils who bring a packed lunch could re their classroom

Whole academy assemblies cannot take place; gatherings must be restricted to class or year group bubbles along with their associated staff bubble.

	Physical changes to sites			
Physical protective measures	All reception areas should continue to operate in the same way as has been applicable since partial reopening, however all should now have screens and intercoms installed.			
	There has been no change to the requirement for all soft toys and play equipment with intricate parts to be removed.			
	Furniture for additional workstations should be brought back into classroom, however to facilitate the maximum number all other furniture should remain in storage elsewhere.			
	Seating in reception areas to remain in storage, reception visitors to be restricted to essential visitors only, one person at a time.			
	Clear desk policy to be maintained and all clutter removed to facilitate cleaning.

Updated guidance

• Although shielding ends from 1 April CEV staff in schools who are CEV will be advised to continue to work from home where possible, but if they work from home should attend their workplace.

Pregnant colleagues are in the 'clinically vulnerable' category and are generally advised to follow the above advice, which applies to all staff in schools. A pregnant colleagues should take particular care to practise frequent thorough hand washing, and cleaning of frequently touched areas in their home or workspace, and follow the measures set out in the system of controls section of this guidance to minimise the risks of transmission.

You are Clinically Extremely Vulnerable if...

- · You have one, or more, of the conditions listed below, or
- Your clinician, or GP has added you to the Shielded Patient List because, based on their clinical judgement, they deem you to be at higher risk of serious illness if you catch the virus.

You are automatically deemed clinically extremely vulnerable if you have one of the following conditions:

- you are a solid organ transplant recipients
- those with specific cancers:
- you are undergoing active chemotherapy
- you have lung cancer and you are undergoing radical radiotherapy
- you have cancer of the blood or bone marrow such as leukaemia, lymphoma or myeloma at any stage of treatment
- people having immunotherapy or other continuing antibody treatments for cancer
- you are having other targeted cancer treatments that can affect the immune system, such as protein kinase inhibitors or PARP inhibitors

 you have had bone marrow or stem cell transplants in the last 6 months or are still taking immunosuppression drugs severe respiratory conditions including all cystic fibrosis, severe asthma and severe chronic obstructive pulmonary disease (COPD) rare diseases that significantly increase the risk of infections (such as severe combined immunodeficiency (SCID), homozygous sickle cell diseas you are on immunosuppression therapies sufficient to significantly increase risk of infection adults with Down's syndrome adults on dialysis or with a chronic kidney disease you are pregnant with significant heart disease, congenital or acquired you have been classed as clinically extremely vulnerable, based on clinical judgement and an assessment of your needs. GPs and hospital clinici have been provided with guidance to support these decisions.
If you live with someone who is clinically extremely vulnerable, you can go to work.

	Staff to be reminded that no personal deliveries should be sent to school.

ur home	
sema or	
taff) to	

Social distancing in small offices	Most school-based roles are not ideally suited to home working and schools may expect most staff to return to work in settings. Some roles, such as some administrative roles, may be conducive to home working, and school leaders should consider what is feasible and appropriate. When on site offices should be arranged to maintain 2m distancing and measures should be in place to ensure they do not mix with other staff/bubbles Receptions where protective measures are fully operational (screen/intercom) can reopen to essential/emergency visitors. General visitors, parents etc. will not be permitted on site except in an emergency or with an appointment (but only in circumstances where it is impossible to meet/converse by any other means). Academies should communicate to parents, how to get in contact in an emergency. Electronic signing in systems will be set up to facilitate contactless operation. Following the increase in numbers on site if there are still rooms on site which are not in use for teaching then they will be out of bounds to everyone, with the exception of designated toilets, hygiene rooms and kitchens/plant rooms, reprographics rooms, reception, Principals and other staff offices (which are to be used for single occupancy only). This it to enable cleaning staff to maintain hygiene of frequently used areas.	
Signing in	All staff to arrive through the main entrance initially, while adhering to social distancing rules. This will ensure that verification is in place for training etc. Only one person in the reception area at any time. All staff are to be signed in/out by the reception staff and recorded in a log book or by contactless visitor management systems.	

STAGGERED ARRIVAL

Drop off	Only one parent/carer should be taking each pupil to school.
	Designated arrival times for each class group or year group – consider multiple entry points to avoid congregations. Principals should include a timetal arrivals and communicate the process for safe arrival/drop off and pick up to parents and staff which should be uploaded to Smart log with the complete Assessments
	We are required to ensure our plans are designed to discourage mixing of year groups on public transport, in the streets around the school and at entrance exits. Parents should be advised about the need to maintain distancing outside the Academy entrances and whilst dropping off their child(ren)
	Ensure appropriate signage at all entry points to site.
	Parents/carers should be informed that arrival outside of designated arrival times will not be permitted.
	Site specific arrangements should be put in place for pupils with disabilities where this may require their parent/carer to accompany the child to the clas door.
Gathering in groups	If pupils are to be assembled at external muster points, everyone must maintain social distancing and they should be escorted inside.
	Class groups to be escorted inside, socially distancing.
	If it is safe to do so and there is an external classroom door then this is to be used as the only entry/exit point, for each class group for the entire day, exc using WCs.
	Should the Principal permit late arrivals, academies must make their own arrangements to ensure the safe transition into classrooms for late arrivals students will be told to arrive via the late gate and will be met by the attendance officer who will ensure social distancing and hand sanitizer will be used.
Move from outdoors to the classroom	In a managed way, all children/staff to wash their hands before taking their seats. Younger pupils should be supervised as they wash their hands for 20 sec
	Classrooms will be set up by site staff, desks spaced appropriately, facing front. In most circumstances non fixed furniture will need to be removed to p sufficient capacity.
	Once arranged for social distancing the layout of a classroom cannot be changed without prior approval of the Principal.
	At the start of each day Teaching staff to remind pupils of social distancing procedures, changes to the way they move around site and the importance of hygiene and hand washing procedures.

Timetabling	Changes to daily timetables will be required to:
	 Avoid large numbers of people gathering on site at drop off/pick up times ensure that opportunities for class/year groups to come into contact are limited, All social times during the school day will be spent in year groups All students will walk on the left of corridors with staggered lunch times to ensure points around the site which would typically be busy are managed reduce contact. ensure there is adequate opportunity to clean high contact surfaces, Staff will remain in control of cleanliness of their own room Onsite cleaning will take place all day with toilets being a high priority give time to clean areas used by multiple class/year groups 5min cleaning/changeover time built into teaching timetables operate revised dining arrangements Staggered lunch times for all year groups. Only one group will eat at a time using the dining room and the auditorium.
Class	
changes/Resources including IT devices	It is still recommended that pupils limit the amount of equipment they bring into school each day, to essentials such as lunch boxes, hats, coats, books, static and mobile phones. Bags are allowed. All pupils are provided with an outdoor locker which they may place essential items in to reduce the possibil transmission of infection. Pupils and teachers can take books and other shared resources home, although unnecessary sharing should be avoided, espe where this does not contribute to pupil education and development
	Equipment and resources are integral to education in schools. For individual and very frequently used equipment, such as pencils and pens, it is recomment that staff and pupils have their own items that are not shared. Where equipment needs to be shared staff will ensure these are cleaned after use . Class based resources, such as books and games, can be used and shared within the bubble; these should be cleaned regularly, along with all frequently to surfaces. Resources that are shared between classes or bubbles, such as sports, art and science equipment should be cleaned frequently and meticulously always between bubbles, or rotated to allow them to be left unused and out of reach for a period of 48 hours (72 hours for plastics) between use by diff bubbles.
	Any movement of students throughout the building should be limited, staff should ensure students remain in lessons except in emergencies and/or to visit with a toilet pass.
Before and After school clubs (ink breakfast clubs)	Before and after school clubs could potentially break the security of bubbles, however Principals can consider the reopening of these facilities and activit they are confident that it will not compromise preparations for the safe reopening of their academy and the full implementation of the agreed CC 19 Operating Procedures and delivery of the agreed Risk Assessments. In the case of its Sports Centres (Skegness, Stanground and The Wells) the has taken the decision that the earliest these should open is after October 2020 half term.
	The full extent of Academy COVID-19 OPs and RAs apply to all before/after school clubs, in addition any clubs must operate in line with the existing class group bubbles in the first instance (this may be reviewed mid-September) and there must be an appropriate method of recording attendance of staff/pupils sha positive case be confirmed.

	If it is not possible or practical to maintain the same bubbles being used during the school day (for example, if the number of bubbles in place during the school day prove impractical to adopt within the wraparound provision) then providers should maintain small, consistent groups. We recognise that schools may not to respond flexibly and build this provision up over time.
	Schools can consult the guidance produced for providers who run community activities, holiday clubs, after-school clubs, tuition and other out-of-school provision for children, as much of this will be useful in planning extra-curricular provision. This includes schools advising parents to limit the number of different out-of-school settings providers they access, as far as possible. Where parents use childcare providers or out of school extra-curricular activities for their children, schools should encourage parents and carers to seek assurance that the providers are carefully considering their own protective measures, and children should only attend settings that can demonstrate this. DfE has also issued guidance for parents and carers, which schools may want to circulate.
	Where provision is operated by an external organisation then Principals must have sight of the providers COVID secure OP and RAs in order to satisfied that the Academy OPs are not compromised in any way. This must also provide assurance that adequate hygiene and cleaning regime in place for any parts of academy premises or facilities/equipment used
	Where schools are satisfied that it would be safe to do so, they may choose to open up or hire out their premises for use by external bodies or organisation such as external coaches or afterschool or holiday clubs or activities. In doing so, schools should ensure they are considering carefully how such arrangements can operate within their wider protective measures and should also have regard to any other relevant government guidance. For example, where opening up school leisure facilities for external use, ensuring they do so in line with government guidance on working safely dur coronavirus (COVID-19) for providers of grassroots sport and gym or leisure facilities.
Music Dance and Drama	In order to ensure there is a broad and balanced curriculum being delivered at STA we need these spaces back in action. Currently there is some work being delivered but this is only for really small groups. Long periods of us not using these spaces will result in outcomes being affected.
	Some students, in years 7 to 10 only , might have a 40-minute PE and/or Dance lesson in their timetable. We recognise that changing from so uniform into their PE kit and then back again takes time away from carrying out meaningful practical activities. Therefore, if your child has a minute PE/Dance lesson period 2 they can arrive at school in their PE kit but they will change into their school uniform at the end of this lesson, also applies for Period 4, but students will arrive in their school uniform and changing into their PE Kit, and stay in these clothes for the final le of the day. Reviewing the classes this affects, this applies to your son/daughter. Please can your son/daughter check their timetable to identify we lesson(s) this applies too; students need to ensure they bring the appropriate set of clothes to get changed into. Any questions they have cars sent to their PE/dance teacher via Teams.
	EA: 7x2EA, 7x3EA, 7Y3EA 8X1EA, 8X3EA, 8Y1EA, 9Y1EA
	PE: 9x1, 9x2, 9x3, 9x4, 9y1, 9y2, 9y3, 9y4 8x1, 8x2, 8x3, 8x4, 8x5 8y3, 8y4 7x3, 7x4, 7x5 7y1, 7y2, 7y4
Physical Activity	Schools have the flexibility to decide how physical education, sport and physical activity will be provided whilst following the measures in their system of controls.
	Pupils should be kept in consistent groups, sports equipment thoroughly cleaned between each use by different individual groups. You can hold PE lesson indoors, including those that involve activities related to team sports, for example practising specific techniques, within your own system of controls. For sp provision, outdoor sports should be prioritised where possible, and large indoor spaces used where it is not, maximising natural ventilation flows (through opening windows and doors or using air conditioning systems wherever possible), distancing between pupils, and paying scrupulous attention to cleaning a hygiene. This is particularly important in a sport setting because of the way in which people breathe during exercise. External facilities can also be used in with government guidance for the use of, and travel to and from, those facilities. Where you are considering team sports you should only consider those sp whose national governing bodies have developed guidance under the principles of the government's guidance on team sport and been approved by the

	are able to use the changing facilities wearing a facemask at all times during changing.
Key p	bints from new guidance:
Unles	s social distancing can be maintained in classrooms then secondary pupils and staff must wear facemasks in classrooms
•	Primary staff must wear facemasks in communal areas Visors are not now considered as an effective face covering and masks should be worn as above (visors may <u>also</u> be worn if preferred) The process for putting on, removing and storing face masks must be communicated to staff and instruction given to pupils The hand washing or hand sanitising regime must now include On arrival After breaks On room changes After eating The requirement 'Must do everything to minimise contacts and mixing' still stands
•	The requirement for ventilation has been clarified and this is compatible with the Trust's previous advice – if any academy was not previously follow this then this is now a requirement
•	See above comment re students, in years 7 to 10 only
EA: 7)	2EA, 7x3EA, 7Y3EA 8X1EA, 8X3EA, 8Y1EA, 9Y1EA
PE: 9	1x1, 9x2, 9x3, 9x4, 9y1, 9y2, 9y3, 9y4 8x1, 8x2, 8x3, 8x4, 8x5 8y3, 8y4 7x3, 7x4, 7x5 7y1, 7y2, 7y4
•	From 29 March outdoor competition between different schools can take place Indoor competition between different schools should not take place until wider indoor grassroots sport for under 18s is permitted. This be no earlier than 12 April
•	In addition to the existing reasons, from 29 March, all parents will also be able to access provision for one of these additional purpose • where the provision is taking place outdoors - all children may access outdoor provision regardless of circumstances • their children are eligible for free school meals and are attending provision as part of the holiday activities and food programme
•	No earlier than 12 April of the roadmap, all parents may access wraparound and extra-curricular provision, without any restrictions o reasons for which they may attend.
•	From 29 March, when all outdoor sports and supervised activities for children will be able to open without restrictions on attendance, activities taking place outdoors can happen in groups of any number. This is because the transmission risk is lower outside.
Scho	ols are able to work with external coaches, clubs and organisations for curricular and extracurricular activities where they are satisfied that it is safe chools should consider carefully how such arrangements can operate within their wider protective measures.

ind in	

	https://www.afpe.org.uk/physical-education/wp-content/uploads/Updated-COVID-19-Guidance-July2020.pdf
	Schools should refer to the following advice:
	 guidance on the phased return of sport and recreation and guidance from Sport England for grassroots sport advice from organisations such as the Association for Physical Education and the Youth Sport Trust advice from organisations such as the Association for Physical Education and the Youth Sport Trust guidance from Swim England on school swimming and water safety lessons available at returning to pools guidance documents
	Activities such as active miles, making break times and lessons active and encouraging active travel help enable pupils to be physically active while encour physical distancing.
	Given the demands on cleaning and potentially extended lunch provision, Principals are encouraged to prioritise activities which can be conduced outdoors on their school estate over those in indoor facilities or that make use of off-site settings.
	If you intend to use any off-site provision and/or transport or external providers this must be supported by appropriate Risk Assessments and approved beforehand. This is so that the Trust can maintain assurance that all activities/provision is delivered in a COVID secure location/mann
Educational Visits	The DfE continue to advise against domestic (UK) overnight and overseas educational visits at this stage see <u>coronavirus</u> : travel guidance for educational set. The Trust will issue further advice to Academies as and when this is advice is updated.
	In the autumn term, academies can resume non-overnight domestic educational visits. However, these should not recommence until further notice from Trust. Our first priority is to ensure our new OPs are embedded and secure before we consider other activities. These trips should include any trip pupils with SEND connected with their preparation for adulthood (for example, workplace visits, travel training etc.). This should be done in line with prote measures, such as keeping children within their consistent group, and the COVID-secure measures in place at the destination.
	Academies can also make use of outdoor spaces in the local area to support delivery of the curriculum. As normal, academies should undertake full and the risk assessments in relation to all educational visits to ensure they can be done safely. As part of this risk assessment, academies will need to consider control measures need to be used and ensure they are aware of wider advice on visiting indoor and outdoor venues.
	Academies must enter all visits on the EVOLVE Visit Management System and, in addition to completing all risk management planning as outlined in the G Health and Safety on Educational Visits Guidance, they must complete the specific COVID-19 risk assessment for educational visits found in the Resource section of EVOLVE.
Corridor use	Principals should put in place walk on the left in single file arrangements if people (staff or pupils) have to move between rooms.
	Support staff have the priority to transit around the academy before any changeover to ensure safety.

e GAT rces	

	BREAK TIMES
Playtime	
•	Break times may need to be staggered by class group or year group.
	Outdoor space is to be divided into sections with a specific area designated for each group if more than one class/year group is outdoors at the same time. to supervise boundaries if more than one class group or year group is outside at any time.
	If the weather does not permit outdoor time, pupils are to remain in their classroom.
	After the break time, supervised handwashing must be carried out.
Staff rooms	Wherever possible staff should avoid gathering in groups or use staff rooms with anyone who is not part of their class group or year group or staff bubble.
	Schools should also plan how shared staff spaces are set up and used to help staff to distance from each other. Use of staff rooms should be minimised, alth staff must still have a break of a reasonable length during the day.
	In order to maintain the security of class group or year group bubbles staff rooms may be used provided social distancing and good hygiene practice is s maintained. However, this is subject to sufficient cleaning resource to clean between staff bubbles. An appropriate timetable for use and cleaning log must place to facilitate this. This is to maintain consistent group contacts only.
	Mail will be delivered to workstations before staff arrive for the day, personal deliveries will not be accepted.
Cleaning	Cleaners will be required on site whilst open to pupils to clean high contact areas, and toilets throughout the day on a continual rotational basis as a minin Given the increase in attendance from September the demands for additional cleaning must be met.
	Should Principals choose to permit the use of staff rooms and use dining halls there must be sufficient cleaning resource in place to support this.
	Electronic devices should not be shared outside class or year group bubbles. If they must be used by alternative bubbles then they must first be cleaned w antiviral wipe.
	Regular cleaning to take place as usual. A cleaning log template is available here.

oup (i.e.	

Social distancing	Staff meetings should take place on teams when there are no suitable spaces where social distancing rules can be adhered to.

	LEAVING SCHOOL
Staggered leaving	We expect all adults to adhere to social distancing whilst waiting to collect pupils. Any special arrangements for collection of pupils to observe parental wishes must be notified to the teacher responsible for handover (ID may be required) Site specific arrangements should be put in place for pupils with disabilities where this may require their parent/carer to collect the child from the classroom

	CLEANING
Availability of staff/daily cleaning routines	Increased occupancy from September will mean that additional demands are placed on the cleaning service to maintain hygiene standards throughout the In particular, the current regime of cleaning high contact surfaces and toilets will result in a need for increased capacity. Site staff are contacting clean staff/contractors to identify resources for cleaning throughout the day. If this is not possible then additional capacity will be required from other sources (contract etc. – this will result in additional costs but must be in place to facilitate opening).
	Without increased resources in place for cleaning throughout the day Academies must not open. All Trust employed cleaning staff must confirm they have read and understood all guidance and risk assessments before commencing work.

d).		
om door.		

the day. cleaning tractors	

All cleaning contractors must confirm to Principals that they have Coronavirus Risk assessments in place which have been communicated to their staff a in addition they will adhere to site specific rules. Principals may seek assistance from Site Staff to collect Risk Assessments from contractors.

Cleaning products which comply with EN14476 must be used where required, in accordance with manufacturer recommendations. Other cleaning p should only be used where a Risk Assessment has identified that the surface being cleaned would not harbour Coronavirus.

A revised cleaning schedule (four daily cleans) of identified high contact surfaces has been issued to site staff. This revised schedule and appropriate must be in place to facilitate opening of any academy. The revised schedule must be in place to ensure high contact surfaces are cleaned throughout the

	PPE/Sanitiser/Antiviral (alcohol based) wipes
PPE - Where necessary, wear appropriate personal protective equipment	Following the DFE's announcement on 25 August 2020, the Trust's position has not changed about the use of face coverings The Trust has, through its C 19 Operating Procedure and Risk Assessments, put in place a range of measures recommended by the DFE to ensure that academies are Covid Secure. Our position is on face coverings is as follows:
	Please follow the up to date DfE guidance below, much of this applies to secondary colleagues
	https://www.gov.uk/government/publications/face-coverings-in-education/face-coverings-ineducation
	Where colleagues are working 1:1 with pupils in secondary and over the age of 11 in special AND social distancing cannot take place then a face co SHOULD be worn. It is not for every 1:1 interaction only those where it is deemed that social distancing cannot take place.
	If primary colleagues are working 1:1 with a pupil, they can be provided with face coverings at their request or at the direction of the Principal.
	If any other colleague wishes to wear a face covering, we as a Trust support them. We would prefer them to wear a visor. We have ordered a supply or visors for all staff in all academies, which will be distributed from 1 September. These are provided at no cost to individual academies.
	Visors are for individual use, must not be shared and as such they should have the users name written on them. They must not be discarded a unattended at any time. They must be wiped with an antiviral wipe (front and back) in between each interaction with a bubble. They are not treated as disposables
	The Trust will continue to follow the latest government guidance on COVID-19, including on the wearing of face coverings and if necessary amend its op procedures accordingly.
	Should local lockdown measures be implemented then there will be a requirement for masks to be worn in corridors and communal spaces (this will apply staff and pupils).

COVID- e.	
covering	
of face	
and left ot to be	
perating	
bly to	

Where there is no local lockdown Schools and colleges will have the discretion to require face coverings in indoor communal areas where social distance cannot be safely managed, if they believe that it is right in their particular circumstances. Adopt this from 2/11/20
Examples of where education leaders might decide to recommend the wearing of face coverings - for pupils, staff and visitors - in communal areas of the education setting include:
 where the layout of the school or college estate makes it particularly difficult to maintain social distancing when staff and pupils are moving around the premises where on top of hygiene measures and the system of controls recommended in the full opening guidance to schools and FE colleges and providers,
permitting the use of face coverings for staff, pupils or other visitors would provide additional confidence to parents to support a full return of children school or college It is vital that face coverings are worn correctly and that clear instructions are provided to staff, children and young people on how to put on, remove, stor dispose of face coverings in all of the circumstances above, to avoid inadvertently increasing the risks of transmission.
The majority of staff in education settings will not require PPE beyond what they would normally need for their work, even if they are not always able to r a distance of 2 metres from others. PPE is only needed in a very small number of cases, including:
 where an individual child or young person becomes ill with coronavirus (COVID-19) symptoms while at schools, and only then if a distance of 2 metre cannot be maintained
 where a child or young person already has routine intimate care needs that involves the use of PPE, in which case the same PPE should continue to used
Read the guidance on safe working in education, childcare and children's social care for more information about preventing and controlling infection, include when, how PPE should be used, what type of PPE to use, and how to source it.
The Trust has ordered and maintained supplies of Sanitiser and PPE for delivery to regional locations. Site staff will be able to arrange local deliveries central point. Sufficient supplies have been delivered to last until the end of summer term. Site staff are currently making an assessment of requirement September. Orders will be placed for delivery over the summer break.
The Trust supply of PPE includes, gloves, aprons, surgical masks, visors, these will also be delivered to a central location for local distribution. PPE shows worn in accordance with the UK government guidance and Trust Risk Assessments.
The Trust has identified a reliable supply of antiviral wipes which can be ordered by local finance teams. Academies should order supplies of antiviral (based) wipes for IT devices, Printers/MFDs and ensure a supply is stationed adjacent. Erratic
Site staff should wear PPE (minimum of disposable gloves) when carrying out any works which involve touching surfaces in rooms that have been or occupied. To reduce the risk of recontamination, this includes rooms that have been deep cleaned and put out of bounds
PPE requirements for cleaning staff is identified in Risk Assessments
PPE is currently not recommended where Social Distancing can be applied. PPE must be used in accordance with the current UK gov guidance in Edu Settings.
Additional PPE may be required (subject to Risk Assessment) where it is not possible to maintain the new social distancing requirements and/or alter protective measures cannot be identified. If this is the case then Principals should contact the Health and Safety team for advice, however the activity measures take place until satisfactory arrangements are in place.

	PPE is required for the provision of First Aid and if support is required where someone has developed symptoms on site. The Procurement team have orders for appropriate PPE for use in these circumstances – quantities are limited and once delivered Principals must liaise with the Procurement team they have line of sight to place further orders for future delivery. The latest UK Government guidance provides confirmation of the circumstances and types of PPE to be worn. This is also complimented by the Trust Ri Assessments.
	UK Gov guidance can be found <u>here.</u>
	The full suite of Trust Risk Assessments and Guidance can be found here.
	Key points from new guidance:
	Unless social distancing can be maintained in classrooms then secondary pupils and staff must wear facemasks in classrooms
	 Primary staff must wear facemasks in communal areas Visors are not now considered as an effective face covering and masks should be worn as above (visors may <u>also</u> be worn if preferred) The process for putting on, removing and storing face masks must be communicated to staff and instruction given to pupils The hand washing or hand sanitising regime must now include On arrival After breaks On room changes After eating
First Aid	The Health and Safety Executive published guidance on <u>first aid</u> during coronavirus (COVID-19) which will support local risk assessments and provides guidance for first aiders. It is clear that treating any casualty properly should be the first concern. Where it is necessary for first aid provision to be admin in close proximity, those administering it should pay particular attention to sanitation measures immediately afterwards including washing hands.
	The Trust Guidance and Risk Assessments for the provision of First aid will be updated as required, however the provision of First Aid is covered within site specific RAs as is links to current UK government guidance
	The provision of PPE for first aid for symptomatic individuals is identified in the section on PPE above.
L	

OTHER ADJUSTMENTS

e placed n so that	
isk	
histered	

Propping doors open	It will be permissible to prop non fire doors open in order to reduce contact with door handles and push plates. Fire doors must not be propped open.
	Approved hold open devices for fire doors have been delivered to all academies where requested for all cross corridor doors and are available for site staft install – this may free up some cleaning resource if as a result there are fewer high contact surfaces (door handles/push plates) to clean as a result
	For the avoidance of doubt, if a door closer is fitted it should be assumed that it is a fire door unless there is evidence to confirm otherwise.
Outdoor play equipment	Outdoor playground equipment should be more frequently cleaned. This would also apply to resources used inside and outside by wraparound care provid Similar rules on hand cleaning, cleaning of the resources and rotation should apply to these resources. Outdoor play equipment may only be used where t is sufficient resource available to ensure it is cleaned between users (appropriate cleaning must be documented).
Ventilation system	The HSE have issued advice that the use of Air conditioning presents a very low risk. Depending on the type of system and provided certain conditions are (see email to all Principals and Site Managers 25 June 2020) air conditioning systems can be used where natural ventilation is not sufficient. However, it is Trust's strong preference that air conditioning is not used.
Water fountains	Water fountains must not be used; (all fountains must be covered with bags). Where this creates a legionella management issue Site Managers must take advice from the Trust's water hygiene contactor Second Element for appropriate actions.
	Staff and pupils should bring a drink to site, however sufficient supplies of water are to be provided for staff and pupils, should they not have brought their
Printing	If printing must be carried out, then social distancing rules must apply and devices are to be wiped down before and after use. Antiviral (alcohol based) wi be positioned adjacent to each machine with appropriate signage.
	Academies may decide to allocate the role to an individual rather than all staff carry out their own printing in order to reduce the number of people using the equipment.
Libraries	The use of Library areas will be subject to confirmation that it is possible to maintain social distancing, there is sufficient cleaning resource in place to main hygiene and the integrity of class, year groups and staff bubbles.
	Browsing the library will not be permitted. Any book required must be logged out and placed in quarantine for 72 hours after use.
Cash registers/revaluation machines	No cash will be taken on site; this applies particularly to the school meals service. Parents should be advised and Academies will need to ensure that elect means of taking payments are in place. If Academies require support to implement a cashless system, please contact the Finance Team.
Deliveries	All gated entry points to site are to be locked, appropriate signage for delivery drivers to call reception for entry to be displayed.
	Provided social distancing guidance is followed, essential deliveries can continue as per usual. The school meals service has made arrangements for deliveries.
	No personal deliveries to be sent to schools.
Lifts	Unless used to support mobility for Pupils and Staff lifts should not be in use. In the event of a lift being used then the must be limited to one person at a till

	FIRE EVACUATION TEST
Emergency	Trust arrangements for a drill at the start of each term have be suspended until the autumn term if the previous drill was satisfactory and there have be
Evacuation Testing	changes in arrangements or personnel since the last drill.
	Fire drills carried out
	As there will be new staff/ pupils in attendance and directional COVID signage (which must be ignored) there is the potential for confusion in an emerevacuation situation. Fire drills must be undertaken in the first week of the Autumn term. The Trust RA has been amended to take account of the requirem Emergency evacuation drills which must be carried out in a way which takes account of the requirement to maintain the integrity of year or class group b whilst evacuating in order not to create a false situation which causes the opposite. In Primary academies most classes exit through an external door, if the case then a drill can take place as usual, if not then please contact the H&S team for advice.
Evacuation Chairs	In multi storey buildings if upper storeys are being used there must be sufficient trained EVAC chair operators at all times that people who might require are on site.
	Academies must ensure that there is a supply of PPE provided adjacent to every Evacuation Chair so that users and handlers who are most likely not from same bubble are afforded additional protection.

	SIGNAGE
Classroom signage	Templates for all coronavirus signs can be found here
	 Before reopening, each classroom should have a poster with: Handwashing instructions Symptom list - highlighting who should not be at school o A revised evacuation plan (if required) o Maximum number of people permitted in this room at any time
Corridor signage	Where required corridors must have one-way signs on the wall opposite each classroom door, opposite each WC door and at changes in corridor dire. These signs must be a different colour to and distinct from any emergency evacuation signs, staff and pupils must be advised that in the event of an emergency one-way systems do not apply, they must evacuate by the nearest safe exit.
Outdoor signage	All outside entry points should have social distancing signs, symptom signs, no entry if symptomatic signs, hand sanitising and hand washing signs. In addition – 'one person only' signs at entry point for reception and an emergency telephone number displayed.

e been no	
mergency ement for p bubbles r, if this is	
iire a chair	
t from the	

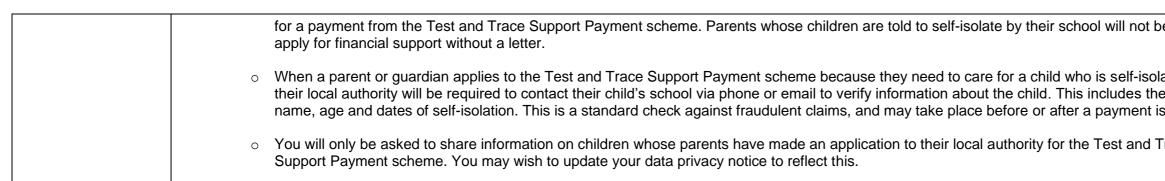

rection. ergency	

~	

	In addition - site entry points (gates, footpaths, driveways etc.) to be locked at all times and an office number displayed.
Other signage	Places where larger groups of people may gather need to have social distancing signs i.e. outside the Academy gates.
	Anywhere pupils or staff may congregate must have appropriate social distancing signage.

	CORONAVIRUS ASSURANCE AUDITS
Site managers	Site managers to complete a daily audit and confirm readiness to open to Principal before opening for the day – logged via email and copied to the Oper Director ahead of a daily Regional check in with site staff.
Principals	Principals to undertake a weekly site walk with Site Manager, H&S Contact and rep and provide weekly assurance that all operations are functioning in accor with this Operating Procedures guidance, Risk Assessments and DfE guidelines.
	Where pupils are told to self isolate, parents on low incomes may be eligible for financial support using the Test and Trace Support Payment Sc I've attached the link to the guidance which also requires schools to send a template letter to parents advising them what to do – I haven't four letter yet though!) <u>https://www.gov.uk/government/publications/test-and-trace-support-payment-scheme-claiming-financial-support/clai financial-support-under-the-test-and-trace-support-payment-scheme</u> There are specific steps and actions for schools to take which I've c below:
	 Applications from parents and guardians who need to take time off work to care for a child who is self-isolating Eligible parents or guardians of children who have been advised to self-isolate by their education setting (even where they have not been to self-isolate by NHS Test and Trace) can also apply for the Test and Trace Support Payment scheme if they are on a low income, unable to from home and need to take time off work to care for a child who is self-isolating. Parents and carers do not require an NHS Test and Trace Account ID number in order to claim and schools are not required to register all children asked to self-isolate with NHS Test and Trace in the same way as staff.
	 The scheme is open to eligible parents and carers of children aged 15 and under, and parents of young people aged 16 to 25 with an educa health and care plan. Further information on how parents and guardians can claim financial support under the Test and Trace Support Payn scheme is available.
	 Schools should provide parents and carers of children advised to self-isolate with the template letter, detailing the child's name and the date their isolation period. The parent or guardian will need to use this letter as supporting evidence as part of their application to their local author

Any member of staff who has concerns that these procedures are not being implemented should raise their concerns with their Line Manager and their Academy H&S Contact in the first instance. If for any reason a member of staff feels unable to do this, they should speak to their Principal or Safety rep. In the event they are unable to do this they should use the Trust Whistle Blowing procedure.

Anyone not complying with revised Operating Procedures should expect to be challenged in a professional and courteous manner and must accept the challenge in a professional way.

Non-compliance can be subject to disciplinary procedures.

Failure to Operate an Academy in compliance with these Operating procedures, associated Risk Assessments and guidance will increase the risk of contamination/infection and therefore if there are any doubts as to the ability to comply an academy should not open.

All measures outlined in the revised Operating Procedures document have been implemented and communicated to all academy staff. All Covid-19 Risk Assessments have been reviewed and amended as necessary and have been communicated to all staff. I have conducted a review of all Operating Procedures with academy SLT, Site Staff, H&S Contact and rep/s and can confirm readiness to reopen to staff and pupils accordingly. This will be reviewed twice weekly and any change in status or required modifications will be recorded on this document and communicated to all staff. Urgent modifications will be implemented and communicated immediately.
